

20,000 LEAGUES UNDER THE SEA

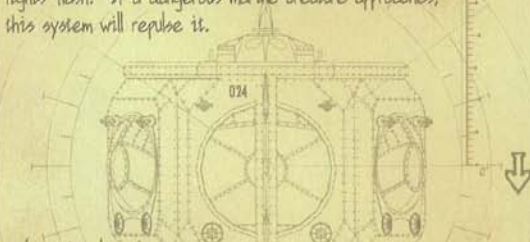

Greetings to my newest crewmembers!
I, Captain Nemo, am sending you on a mission to explore the deep sea in an attempt to make new discoveries. You will be aboard a small submarine, but I will pilot it from the surface, so do not worry.

●Preparation for Submarine Launch
The hatches will be closed after we make sure that all crew members are aboard.

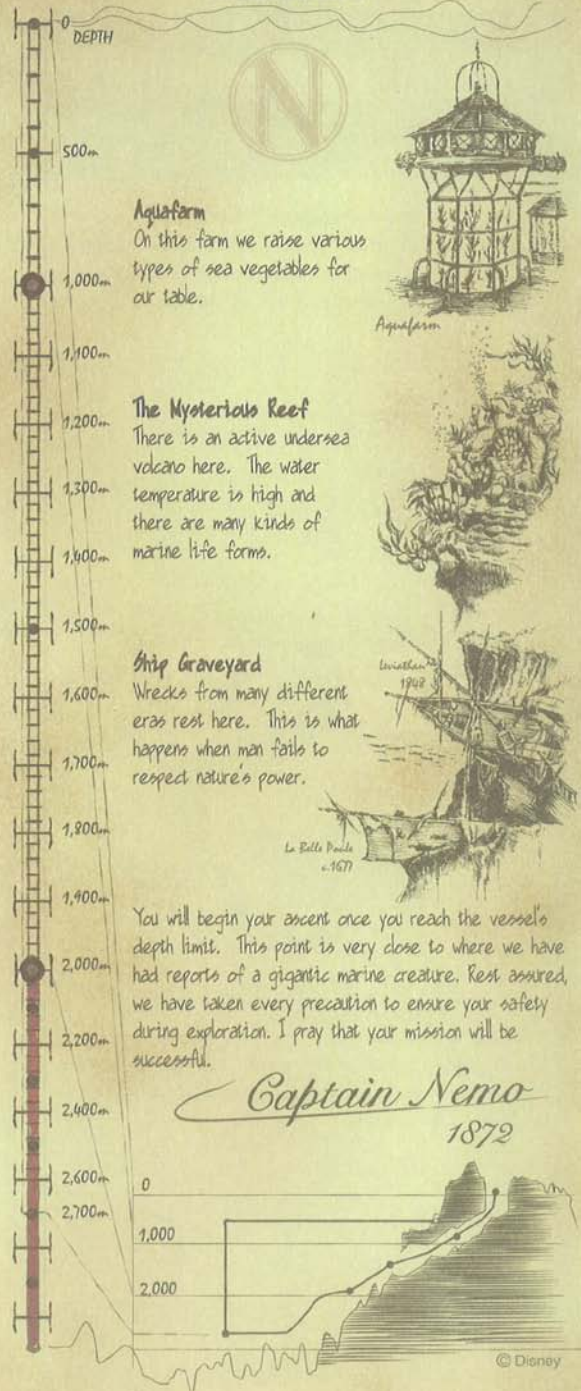

●Defense Systems Check
We will perform a check on this system. Make sure the warning lights flash. If a dangerous marine creature approaches, this system will repulse it.

●Submarine Launch
Hold on to the rails firmly. The vessel may rock when it submerges or in strong ocean currents.

NAVIGATION ROUTE

Aquafarm
On this farm we raise various types of sea vegetables for our table.

The Mysterious Reef
There is an active undersea volcano here. The water temperature is high and there are many kinds of marine life forms.

Ship Graveyard
Wrecks from many different eras rest here. This is what happens when man fails to respect nature's power.

You will begin your ascent once you reach the vessel's depth limit. This point is very close to where we have had reports of a gigantic marine creature. Rest assured, we have taken every precaution to ensure your safety during exploration. I pray that your mission will be successful.
